MULTIPLE CHOICE QUESTIONS Answer ALL Questions

1. Which of the following diseases could be exclusively associated with a river basin?
   A. Malaria
   B. Syphilis
   C. Onchocerciasis
   D. Cholera

2. In mammals, the function of the sebaceous gland is to _________________
   A. produce sweat
   B. secrete sodium
   C. secrete water
   D. produce sebum

3. Osteoporosis is a disease of the _________________
   A. lungs
   B. skin
   C. bones
   D. eyes

4. The type of reproduction that is common to both Hydra and yeast is _________________
   A. grafting
   B. budding
   C. conjugation
   D. binary fission

5. The difference between the largest and the smallest data values is the _________________
   A. variance
   B. interquartile range
   C. range
   D. coefficient of variation

6. The function of ribosomes in cells is
   A. protein synthesis
   B. starch synthesis
   C. transport of materials
   D. lipid storage.
7. Which statement correctly describes homologous chromosomes?

A. They are formed during meiosis
B. They are held together by centromeres
C. They are identical
D. They carry the same gene loci

8. Which one of the following is a correct outline of the main events in photosynthesis?

A. Oxygen reacts with a carbohydrate to produce water and carbon-dioxide in the presence of light.
B. Light join carbon-dioxide to an acceptor compound which is then reduced by hydrogen obtained from water.
C. Light splits water and the resulting hydroxyl group combines with a compound which has incorporated carbon-dioxide
D. Carbon-dioxide combines with an acceptor compound and this is reduced by hydrogen split from water by light.

9. Breathing movement in mammals is accompanied by regular movement of the diaphragm and the ______________

A. intercostal muscles
B. vertebral column
C. clavicle
D. pleural cavity

10. Organisms that require oxygen to grow are called ______________

A. psychrophilic organisms
B. thermophilic organisms
C. aerobes
D. hyperthermophiles.

11. Organisms that retain the blue/purple colour in their cell wall in gram staining technique are ______________

A. microaerophile
B. viable cells
C. gram positive organisms
D. gram negative organisms.

12. Which of the following nitrogenous base is found in RNA but not in DNA?

A. Adenine
B. Thymine
C. Uracil
D. Guanine.

13. The study of groups of organisms is called ______________

A. Ecology
B. Autecology
14. Genetic rearrangement between nonsister chromatids is known as ____________
   A. cross over
   B. synapsis
   C. random fertilization
   D. character

15. One of the following is not a type of dormancy.
   A. Induced
   B. Innate
   C. Enforced
   D. Applied

16. The terrestrial species of class Gastropoda prevent water loss by means of _______
   A. Apiphragm.
   B. Nephridia.
   C. Radula.
   D. Epiphragm.

17. The first forms of life on Earth were thought to be ____________
   A. single-celled plants.
   B. prokaryotes
   C. insects
   D. large animals such as dinosaurs

18. Which polysaccharide is usually found in the cell walls of fungi?
   A. Starch
   B. Glycogen
   C. Chitin
   D. Cellulose

19. What adaptation do seed plants have in addition to the seed that is not found in seedless plants?
   A. Gametophytes
   B. Vascular tissue
   C. Pollen
   D. Chlorophyll

20. Prokaryotes stain as Gram-positive or Gramnegative because of differences in the ____________
   A. Cell wall.
   B. Cytoplasm.
C. Nucleus.
D. Chromosome.

21. External fertilization occurs in ______________ type of environment?
   A. Aquatic
   B. Forested
   C. Savanna
   D. Steppe

22. What kind of ecosystem are exotic species especially threatening to?
   A. Deserts
   B. Marine ecosystems
   C. Islands
   D. Tropical forests

23. Each neurone contains ______________
   A. soma, dendrites and axon
   B. sensory, association and motor
   C. cerebrum, cerebellum and hypothalamus
   D. afferent, efferent and mixed

24. One of these statements is not true about Berry and Drupe.
   A. They both have thin epicarp
   B. They both have fleshy succulent mesocarp
   C. Their endocarp is edible
   D. They both have seed

25. Antibiotic discovery was done by the Scottish bacteriologist __________
   A. Alexander Penicillius
   B. Alexander Fleming
   C. Alexandes Fleming
   D. AlexandesPenicillius

26. The type of cell division which forms the basis of Mendel’s law of segregation is ______________
   A. Mitosis
   B. Meiosis
   C. Somatic
   D. Synoptic

27. Archaebacteria is simply ______________
   A. A prokaryotes without cell wall
   B. An eukaryotes without cell wall
   C. A prokaryote without a peptidoglycan cell wall
   D. An eukaryotes without a peptidoglycan cell wall
28. Leucosolenia belongs to class ________________
   A. Calcispongiae  
   B. Hexactinellida  
   C. Demospongiae  
   D. Porifera

29. A pseudopodia that is threadlike, branched and interconnected is known as ________________
   A. Lobopodia  
   B. Actinopodia  
   C. Filopodia  
   D. Reticulopodia

30. Photosynthetic microphylls are found in ________________
   A. Division Psilophyta  
   B. Division Lycophyta  
   C. Division Sphenophyta  
   D. Division Pterophyta

31. Polio myelitis is an infectious disease caused by ________________
   A. virus  
   B. protozoan  
   C. bacterium  
   D. fungus

32. Which of these is a trace element?
   A. Iron  
   B. Copper  
   C. Calcium  
   D. Sulphur

33. Which of these diseases cannot be prevented by immunization?
   A. Polio myelitis  
   B. Tuberculosis  
   C. Cholera  
   D. Onchocerciasis

34. Hydra removes undigested food by ________________
   A. passing it through the anus  
   B. passing it through the mouth  
   C. means of contractile vacuole  
   D. digesting it through the body surface

35. Which of the following is INCORRECT? The prothallus of a fern ________
A. is a flattened heart shaped structure.
B. is green because its cells contain chloroplast.
C. is the dominant plant.
D. bears the sexual organs.

36. The science of taxonomy has two branches namely _____________ and ______________

A. Biology naming and biochemistry
B. Nomenclature and Classification
C. Botany and systematic
D. Microbiology and systematic

37. To complement biotic analysis in measuring environmental factors the following are studied
   Except
   A. Soil
   B. Water
   C. Topography
   D. Geography

38. The period between inoculation of bacteria in culture medium and the beginning of
   multiplication is known as _______________

A. log phase
B. lag phase
C. stationary phase
D. decline phase

39. Small proteinaceous infectious particles that do not contain nucleic acid genome that codes
   for their progeny are _______________

A. bacteria
B. viruses
C. HIV
D. prion

40. Example of all-purpose media used in cultivation of bacteria by a bacteriologist is

   ___________

A. selenite A agar
B. blood agar
C. nutrient agar
D. tryptone soy agar

41. Which of the following is not a characteristic feature of the phylum Cnidaria?

A. Polymorphism
B. Cephalisation
C. Body of two-germ layers
D. Nematocysts
42. Which of the following groups of plants are not considered as lower plants?
   A. Pteridophytes  
   B. Bryophytes  
   C. Cryptogams  
   D. Spermatophytes

43. Non-living bodies in the cell includes one of these, _____________
   A. Starch grains  
   B. Chloroplast  
   C. Ribosomes  
   D. Cell wall

44. Alternation of generation in plants involves which of the following?
   A. Processes in two sexual pathways  
   B. Processes in one single sexual pathway  
   C. Spores dispersal alone  
   D. Processes in homogamy alone

45. Which of these is not a form of respiration in Amphibians?
   A. Cuteneous  
   B. Tubular  
   C. Pulmunary  
   D. Buccal-Pharyngeal

46. The factor that least affects food shortage in the sub-saharan Africa is _____________
   A. flooding  
   B. pests  
   C. mixed cropping  
   D. drought

47. Which one of the following factors may not directly affect population density of organisms?
   A. Edaphic  
   B. Nutritional  
   C. Mortality  
   D. Emigration

48. One of the major causes of laboratory acquired infection is inhalation of ____________
   A. air  
   B. water  
   C. particles  
   D. infectious aerosol
49. The major cell of the specific immune system are _______________
   A. bone marrow cells
   B. erythrocytes
   C. lymphocytes
   D. monocytes

50. The normal microbacter of the stomach include all of the following except:
   A. Streptococcus
   B. Staphylococcus
   C. Lactobacillus
   D. Diphtheriods
ESSAY QUESTIONS:

Answer FOUR Questions in all; One from each Course

TIME: 2HRS

1. (a). State 6 differences between sexual and asexual reproduction 6 marks
   (b). Write short notes on any 2 of the following:
      i. Haploctonic life cycle
      ii. Diplontic life cycle
      iii. Haplodiplontic life cycle 4 marks

2. (a). Define the following terms
      i. Genotype
      ii. Phenotype
      iii. Hybrid
      iv. Dominant character. 4 marks
   (b). State clearly Mendel’s first and second laws of inheritance 2 marks
   (c). If a pure breeding brown coloured rat BB is crossed with a pure breeding White rat bb, using diagrams only, show the genotype of the offspring up to the second filial generation. 4 marks

3. Describe the formation of two molecules of pyruvate during respiration 10 marks

4. (a). Define the following terms
      i. Aseptic Technique
      ii. Antigens
      iii. Antibodies
      iv. Immunity 4 marks
   (b). List 6 rules that must be observed for any aseptic technique 6 marks

5. (a). How does water in the soil enter the root hair of a plant? 6 marks
   (b). Name the tissue that conducts water from the root to the stem and leaves in a flowering Plant? 4 marks

BIOLOGY ESSAY QUESTIONS

BIO 001: GEN BIOLOGY

BIO 003: MICRO BIOLOGY

BIO 002: BASIC BOTANY
6. (a). State five functions of testosterone  
   5 marks

   (b). With aid of diagram only, describe mature spermatozoon  
   5 marks

   BIO 004: FUNDAMENTALS OF ZOOLOGY

7. (a). What is a tissue?  
   1 mark

   (b). How are plant tissue formed  
   3 marks

   (c). Describe the structure and function of two vascular tissues  
   6 marks

   BIO 002: BASIC BOTANY

8. (a). List any 6 characteristics of the phylum mullusca  
   6 marks

   (b). Give 4 economic importance of the sub-class pulmonata  
   4 marks

   BIO 004: FUNDAMENTALS OF ZOOLOGY
