

Drawing

You have just returned home on a rainy day. You hang your RAINCOAT on a nail on the wall, forming drapery in the process. Your UMBRELLA is still open and lying close to the wall in a $\frac{3}{4}$ view to dry. You pull out your RAINBOOT and leave them lying carelessly below the hanging raincoat and beside the open umbrella in such a way that the sole texture of one of them is facing you while the other one is still standing.

Draw and Shade this composition as depicted, paying attention to perspective and foreshortening.
